

**Instructions:** Simply feed the universal collar through the loop on the end of the tether. Next, wrap the collar around the starter toy securely. You may also install the collar on your Pets favorite toys, tennis balls, etc., even an old sock can be installed on the universal collar!

**WARNING:** Chase It is a keep-away game, NOT a TUG TOY or Chew Toy! NEVER over bend the rod after your Pet catches the toy. Follow the tether to your Pet and get them to release the toy. Damage to the toy WILL occur if you attempt to lift them like a fish! NEVER leave Chase It where your Pet can get to it while unattended. The Chase It is so much fun for your Pet that they will chew it up if left alone.

Some tips for play action include quickly moving the toy on the ground using a Zig-Zag motion as your Pet chases the toy. Make sure to let your Pet win occasionally. A simple 'out' command should be used to get your Pet to release the toy and continue play. The tether may be shortened to any desired length for indoor play by removing the end cap and wrapping the excess tether around the handle.

Tip: All pets have instinct Prey Drive however, if your pet is not toy motivated, try using your Pet's favorite treat on the universal collar first. Then add the toy with a treat in the toy's collar. Soon, you will be able to eliminate the treat and have hours of fun with your new 'toy motivated' Pet! \* Play, Train, Exercise! \*
